

GitHub Assignment Submission Guide

Repository:

<https://github.com/balthapa2023/provider-technical-assignment>

1. Fork the Repository

Go to the repository and click 'Fork' to create your own copy.

2. Clone Your Fork

```
git clone https://github.com/YOUR-USERNAME/provider-technical-assignment.git  
cd provider-technical-assignment
```

3. Add Upstream Repository

```
git remote add upstream https://github.com/balthapa2023/provider-technical-assignment.git  
git remote -v
```

4. Create a New Branch

```
git checkout -b your-assignment-copy
```

5. Work on the Assignment

Make your code changes as required.

6. Commit Changes

```
git add .  
git commit -m 'Completed provider technical assignment'
```

7. Push to Your Fork

```
git push origin your-assignment-copy
```

8. Create Pull Request

Go to your fork on GitHub and create a Pull Request to the main branch of the original repository.

Important Rules

Do not push directly to main. Always use your own branch and submit via Pull Request.
